

**NOT A MONOFILAMENT. NOT A BRAID.
THE ULTIMATE SPINNING REEL LINE.**

NanoFil™

Uni-Filament Fishing Line

Unified Filament Technology
The next generation in fishing line

- Our longest casting line! Anglers will experience exceptional casting distance and accuracy allowing them to cover more water and Catch More Fish!
- Zero stretch means superb sensitivity. Now you can feel everything from the lightest pickups to jarring strikes.
- Made with 100% Dyneema® it has an incredibly high strength/diameter ratio, this is the thinnest Berkley line yet meaning you can go lighter than ever before.
- Zero memory virtually eliminates line tangles, which means you spend less time untangling lines and more time fishing.
- This is the ultimate spinning reel line, outstanding for a wide range of finesse techniques where long and accurate casts or superb sensitivity is key.

Clear Mist

High-Vis Chartreuse

Low-Vis Green

**MINIMUM DIAMETER,
MAXIMUM STRENGTH**
The thinnest line by label rating.

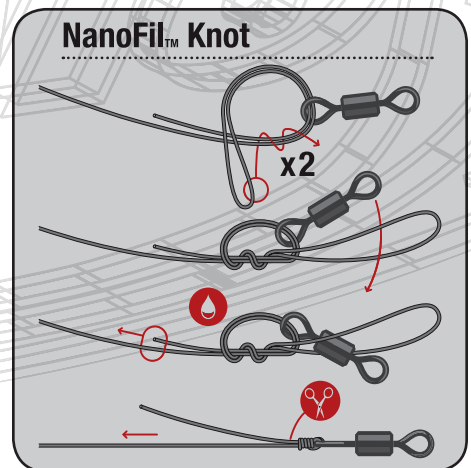

EFFORTLESS CASTING
Casts long, with less effort.
extremely accurate.

ZERO MEMORY
Virtually eliminates
line tangles.

SUPERB SENSITIVITY
Zero stretch to telegraph
absolutely everything.

berkley-fishing.com

NEW!

Trilene[®] Braid

SUPER STRONG

PROFESSIONAL GRADE[™]

Pro Approved!
BY THE BERKLEY PRO STAFF!

OUTSTANDING DURABILITY AND HANDLING IN A TOURNAMENT-LEVEL BRAID!

Trilene[®] Braid and Trilene[®] Tracer Braid

Field-tested and approved by the Berkley Pro Staff, new Trilene[®] Braid is the first braid worthy of the Trilene[®] name. The strongest Berkley braid ever, Trilene[®] Braid features Dyneema[®] fibers in a special Radial Braid construction. This construction has an optimum blend of pick count and 8 carriers to create a weave that is ultra-round, smooth and strong. A special coating technology holds its color longer and results (with the construction) in a smoother, quieter surface that slips through the guides and casts farther.

TRILENE TRACER BRAID COLOR

- Alternating hi and low-vis colors provide point of reference to easily detect line movement!
- Measure your amount of line! Every hi-vis pass is approximately 5 feet.

Brandon Palaniuk, B.A.S.S. Elite Pro and 2013 Bassmaster Classic runner-up:

"The strength and handling of this line is unmatched... The construction creates a braided line that is the strongest I have ever fished."

Davy Hite, B.A.S.S. Elite Pro:

"... this (braid) is the best I have ever used. Casts and handles great!"

★★★★★

SUPER STRONG™

Trilene®

100% Fluorocarbon
PROFESSIONAL GRADE™

PROFESSIONAL GRADE™
Pro Approved!
BY THE BERKLEY PRO STAFF!

CHOICE OF THE PROS FOR OVER 5 YEARS!

Trilene® 100% Fluorocarbon

The "XT" of professional grade fluorocarbons, this proven formula provides incredible shock strength, abrasion resistance and knot strength. Fast-sinking with greater line density for high sensitivity and less "bow" in the water – all advantages for feeling the bite, setting the hook and landing trophy fish.

Same Great Line, New Package!

Skeet Reese: 2009 Bassmaster Classic Champion:

"Trilene 100% Fluorocarbon is the best line on the market. Why fish with anything else?"

Hank Parker Two-time Bassmaster Classic Champion and TV legend:

"This line is absolutely incredible. There simply is no better fishing line out there."

SUPER STRONG™

Trilene®
100% Fluorocarbon XL™
PROFESSIONAL GRADE™

PROFESSIONAL GRADE™

Pro Approved!
BY THE BERKLEY PRO STAFF!

UNIQUE FORMULA! IDEAL FOR SPINNING REELS! HANDLES LIKE MONO.

Trilene® 100% Fluorocarbon XL

The "XL" of professional grade fluorocarbon, this line has all the advantages of 100% fluorocarbon in a formula that fishes like nylon mono! Finally, a pro-grade fluorocarbon that can be used for finesse techniques on spinning reels with confidence. Yet, being fluorocarbon, it sinks for greater sensitivity and lure depth, is virtually invisible underwater, and has higher abrasion resistance than nylon of the same diameter!

**Johnnie Candle, 2010
MWC Champion:**

"I would use this line on a spinning reel without reservation."

**Tommy Skarlis, 2008 FLW
Walleye Tour Champion:**

"I will start fishing fluorocarbon because of this product."

IMPROVED!

The Next Generation of the Smooth Handling Superline™

Fireline® and Fireline® Crystal

FireLine = Superline! The term "Superline" was first used when FireLine was introduced in 1996 – and it has remained the world's true Superline ever since! Not a conventional braid and not a mono – Thermally Fused FireLine changed fishing forever. Now we are re-launching the Next Generation of FireLine. Smoother and tougher than ever with the same powerful strength, smooth handling and fast-casting you know and love!

Improved Formula, New Package!

- Smoother than Ever – Right out of the package!
- Better Castability!
- Tougher than ever – more colorfast, less wear!
- Blaze Orange and Flame Green are brighter than ever!

Microfused™
WITH
Dyneema®

Optimized for
Spinning Reels

Tommy Skarlis, 2009 FLW Walleye Tour Champ:

"FireLine is my "Go to" line for casting baits.... The smoother new formula really allows me to wing the baits out. FireLine's strength makes it an awesome line for ripping baits through the weeds, and more importantly, pulling fish out of heavy cover and getting them into the boat!"

Keith Kavajecz, The Next Bite TV

"FireLine is my "Go to" line for trolling crankbaits on structure. It is durable – for those rocky, snaggy, zebra mussel situations. It has no stretch, so I can monitor the lure for debris and bites, and it is thin to let cranks dive deeper. Give me FireLine and I'll show you fish!"

INCREDIBLY STRONG
Three times stronger than mono.

TOUGH AND ABRASION RESISTANT
Slices through vegetation.

INCREDIBLE SENSITIVITY
Telegraphic feel for structure and strikes.

LONG AND FAST CASTING
Better than ever before!
