ACTION FIRST™

There are many variables that attract fish but none more important than swim action. A crankbait isn't a crankbait really without this paramount feature! Action First puts swim action "First", thus leaving all competition behind. Designed with Sebile's new Xternal Weight System, Action First is a line of baits debuting in 18 shapes from lipless crankbaits to suspending jerkbaits that target the heart of the bass market.

Xternal Weight System

The Action First Series of baits are crankbaits equipped with Sebile's Xternal Weight System allowing for optimal swim action, tracking accuracy, and durability right out of the box! The Xternal Weight System is a customized weight situated on the outside of the bait held in place by the body's shell and visible to the naked eye. The weight is made of a Zinc alloy, the perfect density to achieve all design parameters from swim action to casting distance to tracking. All Action First baits are equipped with a belly hook hanger cemented in the zinc weight. This small, but important design feature increases the hanger's durability and holding power by 4X's and won't pull out of the bait. Equipped with premium black nickel hooks and weighted for pinpoint swim action characteristics, the Sebile Action First baits will be your "go-to" baits for any condition targeting Bass.

BULLCRANK™

The Sebile Bull Crank™ is the “go-to” fat-bodied, crankbait in all shallow to medium depth waters. The Bull Crank is offered in four sizes and two diving depths arming anglers with tools targeting shallow bedding largemouth with a stop and go technique or power crankin in open water. When fishing shallow, there’s no better bait than the shallow lipped Bull Crank. Cast the bait and allow the bait to run and deflect off structure. After the bait makes contact, pause and let it slowly rise waiting for a bite. The medium lipped Bull Crank focuses on open water expanses and deeper structure searching for hungry bass.

DESIGN | Diving “square” bills combined with fat bodies give this bait a wider action and ideal to deflect off cover.

SPECIFICATIONS |

Bait Name	Model	Length	Weight	Type	Casting	Trolling	Hook Size	Line Test	Quantity
2" Bull Crank Shallow	BCR-AF-SL-2-FL	2" 5.1cm	1/4oz 7g	Floating	3 - 5ft, 0.9 - 1.5m	N/A	#6 SS	8-25 lb	1 per Blister
2 1/2" Bull Crank Shallow	BCR-AF-SL-2.1/2-FL	2 1/2" 6.4cm	1/2oz 14g	Floating	4 - 7ft, 1.2 - 2.1m	N/A	#4 SS	10-65 lb	1 per Blister
2" Bull Crank Medium	BCR-AF-ML-2-FL	2" 5.1cm	1/4oz 7g	Floating	6 - 10ft, 1.8 - 3.1m	N/A	#6 SS	8-25 lb	1 per Blister
2 1/2" Bull Crank Medium	BCR-AF-ML-2.1/2-FL	2 1/2" 6.4cm	1/2oz 14g	Floating	8 - 12ft, 2.4 - 3.7m	N/A	#4 SS	10-65 lb	1 per Blister

Range of line # test(ex. 8-65Lb) describes mono/fluoro lines on low end(8), braided lines on high end(65)

SOUND | Silent. No rattles to disuade neutral bass.

XTERNAL WT SYSTEM | Xternal zinc weight assists the bait's tracking while readying the belly hanger for larger, prespawn bass.

BULL MINNOW™

The Sebile Bull Minnow™ is a wider action humpbacked, minnow shape offered in two sizes. When bass are aggressive and feeding the Bull Minnow is ideal as a power fishing tool. For power cranking, cast the Bull Minnow and retrieve the bait at desired speed. Cover lots of water searching for schools of feeding fish. As a power jerkbait, the Bull minnow is designed to handle aggressive fishing by anglers. While retrieving jerk the rod in a sweeping motion causing the humpbacked minnow to swim wildly. Pause for one second and continue this sweeping action using erratic twitches and jerks.

DESIGN | “Humpback” design creates more instability thus a wider swimming action

SPECIFICATIONS

Bait Name	Model	Length	Weight	Type	Casting	Trolling	Hook Size	Line Test	Quantity
4" Bull Minnow	BMI-AF-SL-4-FL	4" 10.2cm	1/2oz 14g	Floating	2 - 5ft, 0.6 - 1.5m	N/A	#4 SS	10-40 lb	1 per Blister
5" Bull Minnow	BMI-AF-SL-5-FL	5" 12.7cm	3/4oz 21g	Floating	3 - 6ft, 0.9 - 1.8m	N/A	#2 SS	12-65 lb	1 per Blister

Range of line # test(ex. 8-65Lb) describes mono/fluoro lines on low end(8), braided lines on high end(65)

SOUND | One large internal free bead creates a knocking sound while jerking enticing fish and promotes casting distance

XTERNAL WT SYSTEM | Positioned low and forward, the Xternal zinc weight stabilizes the Bull Minnow to be worked at higher retrieval speeds

LIPLLESSSEEKER™

The Sebile Lipless Seeker™ is a noisy, lipless search bait available in 2 sizes. Designed with the highest weight ratio of any Action First bait the Lipless Seeker casts far, sinks fast, has an aggressive action, and is the ideal bait for burning over weed flats. Another popular technique is rippin' it or yo-yo. When the bait sinks nose down and comes to rest on the bottom, jerk the rod vertically accentuating bait's vibration and rattle. The Lipless Seeker is great for bedding fish and less structured terrain. While jigging it will always come to rest nose down not falling over to one side, thus increasing bite and hookup ratios.

DESIGN | Front facing designed to translate retrieve's energy into high action

EXTERNAL WT SYSTEM | Ultra forward weighting drives the "Seeker" and optimizes internal chamber for more rattles

SPECIFICATIONS

Bait Name	Model	Length	Weight	Type	Casting	Trolling	Hook size	Line Test	Quantity
2 1/2" Lipless Seeker	LSE-AF-NO-2.1/2-SK	2 1/2" 6.4cm	1/2oz 14g	Sinking	4 - 6ft, 1.2 - 1.8m	N/A	#5 SS	8-40 lb	1 per Blister
3" Lipless Seeker	LSE-AF-NO-3-SK	3" 8.3cm	3/4oz 21g	Sinking	5 - 7ft, 1.5 - 2.1m	N/A	#2 SS	10-65 lb	1 per Blister

Range of line # test(ex. 8-65Lb) describes mono/fluoro lines on low end(8), braided lines on high end(65)

SOUND | Heavy brass beads cause high pitch rattle ideal in stained to muddy waters. Rattles present in both head and belly chambers.

RACER CRANK™

The Sebile Racer Crank™ is a medium-bodied crankbait offered in three sizes and diving depths designed to go deep! Equipped with an ultra-low Xternal weight, the Racer Crank is ideal for both open, deep waters and power fishing. Use the power crankin' technique to cover large expanses of water by casting the bait and continually working it like a search bait for deep fish in open water. The Racer Crank is also ideal to use when targeting fish relating to deep, submerged structure. Cast the bait and retrieve until you reach desired depth. Allow the bill to do all the work. On a slow roll retrieve, make bottom contact, pause and let the bait slowly rise 1 to 5 seconds waiting for a fish to strike.

SPECIFICATIONS |

Bait Name	Model	Length	Weight	Type	Casting	Trolling	Hook Size	Line Test	Quantity
2" Racer Crank	RCR-AF-LL-2-FL	2" 5.1cm	1/8oz 3.5g	Floating	6 - 8ft, 1.8 - 2.4m	≤10ft, ≤3.1m	#10 SS	4-12 lb	1 per Blister
2 1/2" Racer Crank	RCR-AF-LL-2.1/2-FL	2 1/2" 6.4cm	3/8oz 10.5g	Floating	8 - 12ft, 2.4 - 3.7m	≤16ft, ≤4.9m	#6 SS	6-20 lb	1 per Blister
3" Racer Crank	RCR-AF-LL-3-FL	3" 7.6cm	5/8oz 17.5g	Floating	10 - 15ft, 3.1 - 4.6m	≤24ft, ≤7.3m	#4 SS	8-25 lb	1 per Blister

Range of line # test(ex. 8-65Lb) describes mono/fluoro lines on low end(8), braided lines on high end(65)

DESIGN | The bill design and body shape work in unison to create a tight action, deep diving crankbait

SIZE VERSATILITY | The Racer Crank comes in 3 sizes (2", 2 1/2", and 3") emulating Bass forage throughout the entire year

XTERNAL WT SYSTEM

Positioned low and forward, the Xternal zinc weight allows the Racer Crank to swim at the proper angle optimizing swim action and depth

SQUAREBILL SUNFISH™

The Sebile Squarebill Sunfish™ is exactly what the name implies, a flat-sided crankbait that has a body profile that of a sunfish, top prey for largemouth bass! Offered in one size and depth, the Squarebill Sunfish has a wide swim action. On a steady retrieve, the Squarebill Sunfish is ideal for fishing any shallow water condition, clear to murky waters. Cast the bait and retrieve until desired depth is reached allowing it's "square" bill to do all the work.

Another technique for this shallow bait is stop and go. As the bait is retrieved and contact made with structure, pause the bait for 3-5 seconds waiting for predatory fish targeting sunfish to strike. Power cranking this bait through submerged structure is another effective technique.

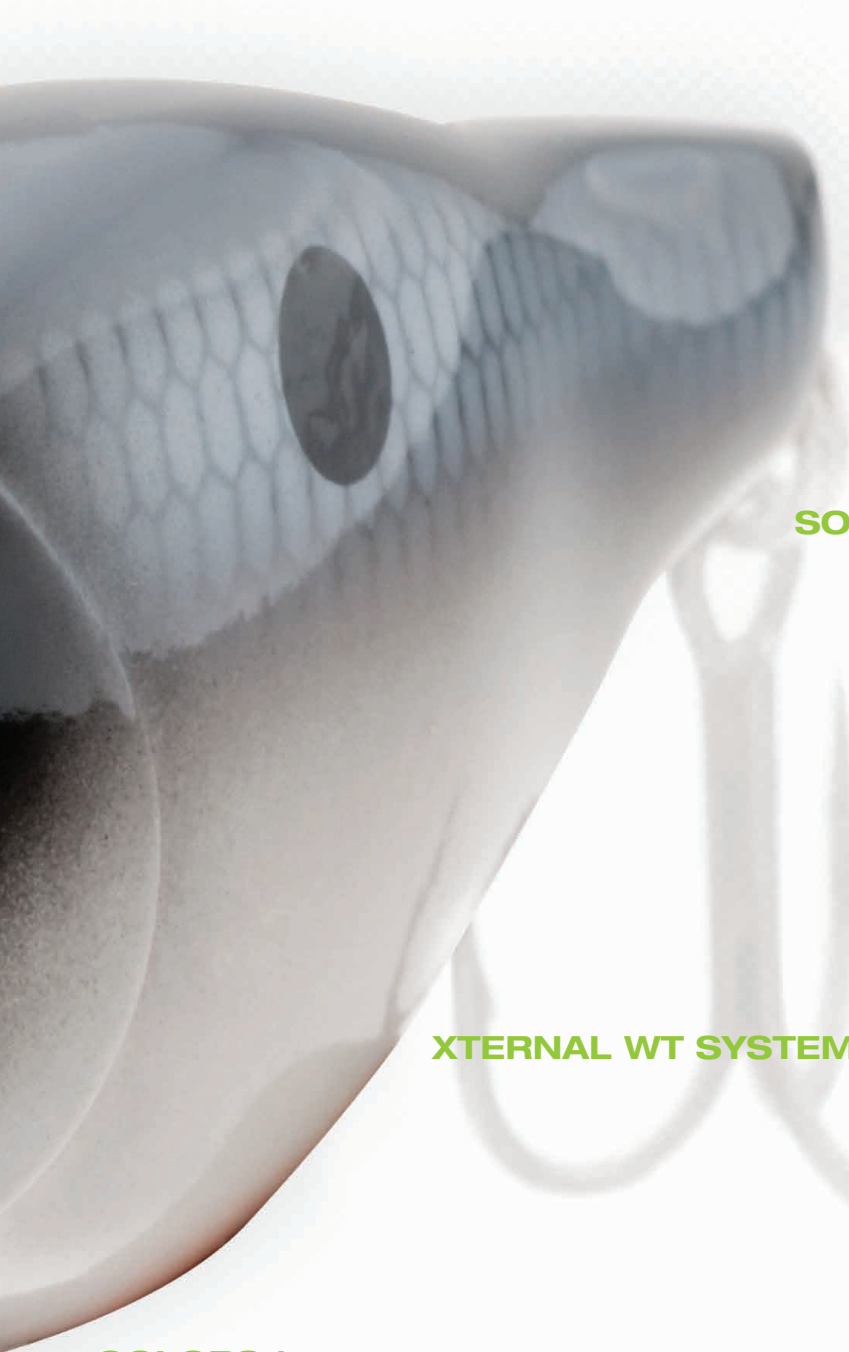

DESIGN | Shallow diving "square" bill combined with flat sided body gives this bait a wide action, emulating prey. The most snagless of all action first crankbaits due to the body and bill design!

SPECIFICATIONS |

Bait Name	Model	Length	Weight	Type	Casting	Trolling	Hook size	Line Test	Quantity
2 1/2" Squarebill Sunfish	SSF-AF-SL-2.1/2-FL	2 1/2" 6.4cm	3/8oz 10.5g	Floating	2 - 6ft, 0.6 - 1.8m	N/A	#4 SS	8-65 lb	1 per Blister

Range of line # test(ex. 8-65Lb) describes mono/fluoro lines on low end(8), braided lines on high end(65)

SOUND | One internal free bead creates a knocking and rolling sound enticing fish, while also increasing casting accuracy.

XTERNAL WT SYSTEM | Positioned low and forward, the Xternal zinc weight allows the Squarebill Sunfish to be stable even at higher retrieval speeds

STARSHINER™

The Sebile Star Shiner™ is a slender minnow jerkbait offered in two sizes and diving bills designed to suspend for finesse situations! When the water temperatures are cooler and bass are neutral the Star Shiner's tighter swim action is crucial for catching fish. Cast the bait and allow the Star Shiner to swim into and deflect off structure. After the bait makes contact, pause and let it slowly rise waiting for a fish to strike. The Star Shiner's versatility is evident when used as a power jerkbait. Jerking the rod in a sweeping motion will cause the bait to swim wildly. Pause for 1 second and continue this sweeping action using erratic twitches and jerks. Also great for slow rolling.

DESIGN | Shallow and medium diving bill designs in conjunction with sleek minnow bodies creates tight swim actions for finesse situations

SPECIFICATIONS |

Bait Name	Model	Length	Weight	Type	Casting	Trolling	Hook Size	Line Test	Quantity
3 1/2" Star Shiner Shallow	SSH-AF-SL-3.1/2-SU	3 1/2" 9cm	1/4oz 7g	Suspending	2 - 5ft, 0.6 - 1.5m	≤5ft, ≤1.5m	# 8 SS	6-20 lb	1 per Blister
4 1/4" Star Shiner Shallow	SSH-AF-SL-4.1/4-SU	4 1/4" 10.8cm	1/2oz 14g	Suspending	3 - 6ft, 0.9 - 1.8m	≤6ft, ≤1.8m	# 6 SS	8-25 lb	1 per Blister
3 1/2" Star Shiner Medium	SSH-AF-ML-3.1/2-SU	3 1/2" 9cm	1/4oz 7g	Suspending	6 - 8ft, 1.8 - 2.4m	≤11ft, ≤3.4m	# 8 SS	6-20 lb	1 per Blister
4 1/4" Star Shiner Medium	SSH-AF-ML-4.1/4-SU	4 1/4" 10.8cm	1/2oz 14g	Suspending	8 - 10ft, 2.4 - 3.1m	≤14ft, ≤4.3m	# 6 SS	8-25 lb	1 per Blister

Range of line # test(ex. 8-65Lb) describes mono/fluoro lines on low end(8), braided lines on high end(65)

SOUND | One internal free bead creates a knocking sound enticing fish while jerking, but not overpowering with multiple smaller rattle beads.

EXTERNAL WT SYSTEM | External zinc weight(s) along with precise internal ball allows the Star Shiner to be balanced and suspend enticing neutral bass

VIBEMACHINE™

The Sebile Vibe Machine™ is a one knocker lipless crankbait offered in two sizes. Taller in shape profile, than the Lipless Seeker™, the Vibe Machine has a wider action, one knocking bead and ideal for triggering a reaction bite emulating small prey for bass. The two techniques the Vibe Machine was designed for are fishing structure and slow rollin'. When fishing structure, cast the Vibe Machine and retrieve to desired depth keeping contact with structure. The bait will deflect efficiently and recover quickly back to its original retrieval line. Slow rollin' a lipless bait can be highly effective in deeper water. Cast the bait and let it sink to desired depth. Raise the rod vertically and methodically accentuating bait's vibration. Continue this jigging method varying speed and depth.

EXTERNAL WT SYSTEM | Ultra forward and low weighting drives the Vibe Machine for a realistic tail swimming motion, perfect for clear or shallow waters.

SPECIFICATIONS

Bait Name	Model	Length	Weight	Type	Casting	Trolling	Hook Size	Line Test	Quantity
1 3/4" Vibe Machine	VMA-AF-NO-1.3/4-SK	1 3/4" 4.5cm	1/8oz 3.5g	Sinking	3 - 5ft, 0.9 - 1.5m	N/A	# 8 SS	4-25 lb	1 per Blister
2 1/4" Vibe Machine	VMA-AF-NO-2.1/4-SK	2 1/4" 5.7cm	1/4oz 7g	Sinking	4 - 6ft, 1.2 - 1.8m	N/A	# 5 SS	6-40 lb	1 per Blister

Range of line # test(ex. 8-65Lb) describes mono/fluoro lines on low end(8), braided lines on high end(65)

DESIGN | Wide and rounded front face designed to translate retrieve's energy into a wider action and increased recovery after deflecting off cover.

SOUND | One knocker heavy brass bead gives a regular clicking rhythmic sound.

Sebile®

**PREMIUM LINE &
TERMINAL TACKLE**

ACast Minnow

The ACast Minnow is designed to be a long casting minnow with a lot of disturbance and flash in the water. With the help of an internal weight transfer system the ACast Minnow is one of the longest casting minnow baits on the market.

A.T. WORM

The goal of the A.T. Worm design was to create a durable worm that allows for every rigging type, traditional and innovative, with unique swimming action. It works in all terrains (A.T.) and conditions with unique features and benefits for anglers. From the unique tail shape and versatile rigging holes and slots to the V-Hull head and durable thick-walled body this worm will be your "Go-To" soft plastic for years to come.

Bonga Jerk

The Bonga Jerk is designed to be an easy pulling, high profile bait that can be fished in multiple techniques thanks to its Power Keel technology. The bait can be trolled or used as a jerkbait because the Power Keel assists the Bonga Jerk in slicing through the water with incredible agility and lifelike action.

Bonga Minnow

The Bonga Minnow is a topwater bait designed with a large profile allowing for versatile surface swimming action. Available in 3 sizes, all Bonga Minnows are deadly when using a stop-and-go retrieve with pauses technique. Each size is designed to emulate specific sized prey for hungry predatory fish!

Crankster SR

The Crankster SR is a fat-bodied, shallow running crankbait designed for maximum casting distance and accuracy while emanating an abundance of noise. The SR's lip design is set at a special angle, matched to the shape and balance of the body, so that the bait will swim seductively a few inches under the surface. This creates an attractive trail of subsurface turbulence and heavy rattling noise that predators sense with their lateral lines.

Crankster MR

The Crankster MR is a fat-bodied, medium running crankbait designed for maximum casting distance and accuracy while emanating an abundance of noise. The MR's extended lip design edges the lip out away from the nose of the lure and helps the lure react instantly. That unique square lip is designed to deflect sharply, shooting the Crankster wide to the side whenever it hits an underwater obstruction.

D&S Crank

The D&S Crank is revolutionary in its ability to catch fish and snag less in heavy cover where anglers don't dare risk using and losing other lures. Whether retrieved or trolled, Sebile's patent pending Gravity Snagless Hook System uses the Earth's natural attraction to hold the hook down in its lowest position possible, permitting the bait to run through heavy grass, brush, rocks, and timber. When a fish bite, the closing pressure of its jaws on the lure will raise the hook point up to catch the fish's mouth.

Fast Cast

The Fast Cast is all about achieving maximum casting distance. The balance, weight distribution and center of gravity, the aerodynamics have been optimized to the extreme, giving the Fast Cast an unerringly straight flight, tail first, on every cast. Its heavy metal body makes it not only the longest casting but the longest lasting lure you can dream of. The Fast Cast has an erratic swimming motion with which you can do different things using various speeds, reeling steady or working with twitches, pulls and pauses. Also a great jigging lure.

Flatt Shad

Using lipless baits to search for fish is redefined with the versatility provided by all Flatt Shad models. No matter what size or species of gamefish you pursue, there's a Flatt Shad model that's perfect for any predator from the smallest to the largest, shallow or deep, in fresh or saltwater.

Ghost Walker

Designed to be your “go to” topwater bait, the Ghost Walker combines very good castability with a very easy ability to walk the dog across the surface with great agility and little effort by the angler. The Ghost Walker can also be retrieved steadily with the rod down creating a wake across the water emulating a frog, mouse, baitfish, or other aquatic creature trying to seek immediate shelter.

Koolie Minnow

The Koolie Minnows offer a multitude on bill shapes, sizes, and buoyancies for all fishing applications. Small Lip (SL) version is a shallow minnow designed to fish over submerged grass or in the tops of emergent trees or brush by use of a slow retrieve. The “ML” is a medium diving minnow designed to be fished anywhere from two to ten feet deep depending upon the technique. The Koolie Minnow BRL rolls side to side, generating a zigzag action that’s terribly exciting to predators and draws fish from great depths and distances. The Koolie Minnow LL is a deep diving minnow designed to be the deepest diving bait on the market while optimizing swim action and ease of use.

Long Slide

The goal in creating the Long Slide was to design a slim shaped metal jig mimicking long, fast moving baitfish. The body has a smaller volume than most other metal jigs which reduces water pressure making it very easy for the angler to use especially on those long blue water trips. The Long Slide is equipped with a full wire that extends from the tie on to the rear hook hanger maximizing the lure’s strength. One key feature is the way the hook is attached to the body. A swivel connects the body to the hook allowing for a hooked fish to move freely preventing it from throwing the hook and lure.

Magic Swimmer

The lipless, balanced design of the jointed, thin-body Magic Swimmer creates a unique and natural action that sets this bait apart from all others. The tapered nose and humpbacked head slice through the water and create the undulating action. The bait performs perfectly in a wide variety of retrieval speeds, from a slow crank to high speed trolling. This provides fish the most realistic swimming bait in the water!

Magic Swimmer Soft

The Magic Swimmer Soft is a jointed soft plastic bait that swims as good as the original Magic Swimmer hardbait, PLUS it can be rigged Texas-rigged, Carolina-rigged, or just with a wide gap weedless hook. Intricate details and realistic swimming action bring the lure to life. Swimming it, jigging it, or jerking it, the Magic Swimmer Soft is sure to please in all angling situations.

Onduspoon

A fluid, natural appearance, its mesmerizing undulation and multi-chambered hard plastic body filled with noisy rattle beads distinguish the Sebile Onduspoon from all the rest. It is designed not to twist your line even when you burn it back or troll it. It’s heavy so you can cast it as far as a lure can go, but hollow so when it hits the water the Onduspoon’s horizontal descent is enticingly slow to make it linger in the strike zone longer. The unique sequence of internal rattle chambers contributes to the lure’s balance, swim action, and noise to entice all predatory fish.

Pro-Shad Spinnerbaits

The Sebile Pro-Shad Spinnerbaits are quite different from blade shape and size, wire style, to hook size and type. The Finesse style offers two larger asymmetric blades emulating a school of shad and also lowering the resistance in the water during a retrieve so the angler can cover more water. The Trophy style offers one larger asymmetric blade, comes in larger sizes targeting trophy fish, and offer a welded wireform for added strength and durability. All spinnerbaits come with a wide gap Sebile hook making for better hook sets.

Proppler Buzz

The Proppler Buzz features a floating, hollow body that churns the water as it spins and splashes PLUS it is filled with raucous rattles that demand attention. Equipped with an oversized round bend hook the Proppler Buzz is efficient at holding and landing big fish. The versatility of the Proppler Buzz is unparalleled because of its flotation. No other buzz bait has this feature and will put more fish in the boat.

Rattler

The Rattler is a flat-sided crankbait having a thin, compressed body but comparatively tall side profile. The big difference between the Rattler and other shallow shad baits is the casting advantage created by the mass transfer system which allows for a ball to transfer to the tail during a cast then returning to it’s original position on the retrieve.

Shallow Spoon

The Shallow Spoon was designed to have a very small, compact body that is exceptionally heavy for its size to permit long yet accurate casting. While being heavy, the goal was also to have this lure be able to stay quite shallow. The Shallow Spoon is equipped with a much larger hook as compared to its body and a weedguard allowing the lure to be fished in a wide range of conditions.

Slender Eel

Used by those who target spooky or highly-pressured fish particularly in clear water, in both fresh and salt, the Slender Eel is ideal for sight fishing. The lure swims with a wide swaggering sweep of its tail and suspends underwater with a nose down posture when paused. When twitched, jerked or ripped, it comes to life with an erratic action!

Slim Stick

The Slim Stick is a one knocker top water that is as thin and curvy as the Bonga Minnow is short and fat. The slender yet sturdy and distinctly styled Slim Stick comes in three sizes to cover light, medium, and heavy fishing situations. All three sizes walk the dog with ease and precision. The Slim Stick is a super long casting champion and expertly balanced that even on the end of a long cast, it usually only takes one rod tip bounce to start a walking cadence and an instant rhythm of fluid zigzag motion shaking across the surface.

Spin Shad

Sebile's award-winning Spin Shad is a versatile lure that can catch almost anything that swims in fresh or saltwater. There are not that many baits you can burn, you can have a medium speed retrieve, go slow, even bottom bouncing or yo-yo it. Resembling a small school of baitfish the body and blade work in sync. The body is both durable and realistic while the blade offers powerful vibrations translating these vibrations into the body to create an enticing swim action.

Splasher

The Splasher combines the actions of three conventional topwater types – poppers, chuggers, and walkers in one. The Splasher has a huge, deep bowl of a mouth, a blaring trumpet-shaped head, a water-slicing "Power Keel" and a flattened belly in order to skate and pivot more easily on the surface. Although the head is large, the tail is thin and flat – the best shape for a fish to engulf it and get hooked securely.

Stick Shadd

The Stick Shadd was designed to be controlled 100% by the angler to cover almost all fishing situations. Offered is a wide variety of sizes, buoyancies, and colors. Floating models work best just below the surface, often slightly breaking the water during a twitched retrieve. Sinking models are perhaps the most versatile overall, because they can be used at any depth from top to deep. The suspending versions are ideal as jerkbaits when predatory fish prefer their prey to sit horizontal and not rise or sink at all.

Vibrato

A totally unique new lure concept, the Sebile Vibrato is designed to have a natural vibrating action but unlike any other vibrating lure it vibrates on the fall, when slowly jigged, twitched, retrieved steadily or trolled in any way and at any speed! The unique constant vibration is due to the design of its body being deeply compressed with a wider belly and a thinner back, thus causing it to vibrate regardless of how it is fished.

Dressed Trailer Hook

Sebile brings innovation to anglers in every way we can help your fishing, including the Dressed Trailer Hook. With a wider gap than a normal trailer hook, it holds better in the fish's mouth. The point sits at a level slightly above the primary lure's hook point. Strong and super sharp, the hard black nickel finish is durable and corrosion-resistant in both fresh and saltwater. By adding a skirt to the trailer hook, it makes the lure's visual volume bigger to increase the action and apparent size of the bait to the fish. The

Dressed Trailer Hook is the perfect addition to spinnerbaits, buzzbaits and jigs.

Flats Jighead

The Sebile Flats Jighead has no equal. The super-sharp hook is built to Japanese premium hook style standards and is 20% stronger than any other jig hook and 44% stronger than the average. Its extreme strength makes the Flats Jighead ideal for salt and freshwater brutes, including the biggest, baddest battlers on the planet. Among all its key features the Flats Jigheads are extremely durable due to its powder coated outer shell. The Flats Jigheads come in a multitude of weights, hook sizes and shank lengths to fit all baits and fishing needs. They may be used in conjunction with both natural baits and literally any soft plastic made.

Game Snaps

Sudden opportunities often arise to catch a fish on a lure other than the one attached. Unfortunately, it may take too long to retie and the opportunity can be lost. There are three styles of game snaps; Light, Medium, and Power. The Light Game Snaps are egg shapes and made for light line fishing, very small to small lures with subtle action that may be stifled by too heavy a snap. The Medium Game snap is also egg shaped, but has a cross lock and will meet most situations and fishing needs. The Power Game snap, elongated in shape with heavy interlocking wire, is reserved for the strongest fish. For medium to extra large lures, strong to extra heavy lines, perfect for all big game fish in fresh and saltwater.

Soft Weight System

The Sebile Soft System can be used with any kind of soft plastics whether worms, grubs, lizards, frogs, crawdads, swimbaits, soft jerkbaits or others. The custom-designed hooks are strong, ultra-sharp, and made to the highest precision Japanese hook standards. The soft weights feature a Tungsten filled rubber compound style construction so that they can be easily added, repositioned on the hook shank and removed to make on-the-water adjustments to fishing conditions.

Swimbait Rig

The Swimbait Rig is part of the Sebile Soft Weight System family which uses small weights made of Tungsten filled rubber compound. A strong hook hanger loop is welded to the wide gap hook shank and a fixed weight is molded on the front part of the shank. A strong split ring, swivel and treble hook are attached to the welded ring. The Swimbait Rig includes the Soft Weight System so you may add weights to almost double the total weight and position them as needed for different casting situations, falling movements, swimming actions and depths.

Split Rings

The Sebile split rings are the same ones that come standard on each Sebile hard bait. They are specified and selected by Patrick Sebile for their long-lasting reliability. Size to size, they are amongst the strongest on the market, with a high resistance against pull and opening. The stainless steel selected for these rings is properly forged for an even increased resistance and ability to endure, plus they are rustproof.
